MEET SEAN DEERY

HUNTING MAGUIRE
HELPING COMPANIES GROW BETTER. FASTER. STRONGER

Sean Deery

**Founder &
Chief Strategic Officer**

Sean Deery is the Founder and Chief Strategic Officer of Hunting Maguire LLC, a private strategic advisory firm serving UHNW families, executives, and institutions facing high-stakes decisions.

He provides confidential, intelligence-informed counsel that combines strategic clarity, real-world pragmatism, and absolute discretion. Over his career, Sean has advised on sensitive initiatives touching national security, economic strategy, emerging technologies, and large-scale humanitarian development.

Known for his ability to synthesize complex information quickly, identify hidden patterns, and map risk and opportunity, Sean operates as a trusted strategic partner for leaders navigating transitions, crisis environments, reputational challenges, and long-term strategic repositioning.

Above all, Sean believes exceptional leaders deserve exceptional counsel—and that the right strategy, at the right moment, can alter the trajectory of an organization, a market, or even a country.

WHAT HUNTING MAGUIRE IS

A Private Strategic Advisory Practice for High-Stakes Decisions

Hunting Maguire provides confidential strategic counsel to leaders, institutions, and private clients whose decisions shape markets, policy, and global outcomes. The firm was intentionally designed to serve a limited number of clients at any given time, ensuring each engagement receives founder-level attention and rigor.

We operate at the intersection of strategy, intelligence, and execution—helping clients:

- Gain clarity in complex environments
- Strengthen positioning and influence
- Navigate geopolitical, economic, and organizational risk
- Design long-range strategies with real-world implementation pathways

Our mission is simple: to deliver clarity, insight, and high-precision strategy that strengthens influence, accelerates decisive action, and creates enduring impact.

WHO WE SERVE & HOW WE HELP

WHO WE SERVE

Leaders Shaping the Future

Hunting Maguire works with clients whose decisions carry outsized consequence:

- UHNW individuals and families
- Founders, CEOs, and executive teams
- Family offices and private investors
- National and regional institutions
- Sports leagues and major franchises

High-impact philanthropic and humanitarian initiatives

HOW WE HELP

We provide a discreet, high-trust environment for leaders who need:

- A confidential sounding board
- A strategic co-architect for major initiatives
- A clear framework for navigating uncertainty
- Independent analysis free from internal politics

Whether the question is “Where do we go next?” or “How do we stabilize what we’ve built?”, Hunting Maguire brings structure, insight, and executable pathways to the table.

THE OUTSIDE CHIEF STRATEGIC OFFICER MODEL

The Outside Chief Strategic Officer

More Than a Consultant. A Strategic Partner.

Most leaders already have advisors, lawyers, bankers, and internal teams. What they often lack is a dedicated strategic counterpart—someone who can sit above the noise, integrate inputs, and help design the bigger arc.

That's the role of the **Outside Chief Strategic Officer (Outside CSO)**.

As an Outside CSO, Sean:

- Works directly with the principal (and key lieutenants)
- Helps define and refine long-term strategic direction
- Translates vision into actionable roadmaps and decision frameworks
- Stays engaged beyond the “deck” to support execution and adjustment
- Provides confidential counsel on sensitive, personal, or reputational matters

Clients gain the benefits of a high-caliber Chief Strategy Officer—without the constraints, visibility, or overhead of a full-time executive hire.

STRATEGIC PHILOSOPHY & PILLARS

Our Strategic Philosophy

Strategy Is an Operating System, Not a Document.

We believe strategy should guide how leaders think, decide, communicate, and execute—not just what appears in a slide deck once a year. Every engagement is anchored in four pillars:

Integrity

We tell the truth as we see it—grounded in facts, analysis, and your best interests. Confidentiality and discretion are non-negotiable.

Innovation

We look for leverage, not noise. Technology, AI, and emerging systems are tools to unlock better judgment and more resilient models—not buzzwords.

Impact

Every recommendation must connect to real outcomes: stronger positioning, reduced risk, better decisions, and measurable progress.

Legacy

We help leaders think beyond the quarter or news cycle—toward institutions, families, and initiatives that endure and compound over time.

These pillars shape how we analyze, advise, and design strategy with every client we serve.

THE HUNTING MAGUIRE METHOD

The Hunting Maguire Method

A Structured, Iterative Approach to High-Stakes Strategy

Strategize

Define objectives, constraints, and risk profile. Map the geopolitical, economic, regulatory, and organizational landscape to identify the real questions that matter.

Design

Create the strategic model—decision frameworks, institutional architecture, and scenario pathways that clarify options, trade-offs, and direction.

Develop

Convert strategy into executable plans: initiatives, structures, communication, and stakeholder materials.

Deploy

Support execution with discreet guidance—aligning teams, sequencing actions, and maintaining momentum.

Optimize

Refine in real time based on data, feedback, and evolving conditions to ensure continued alignment and performance.

Analyze

Assess outcomes, extract lessons, and strengthen the long-term strategic operating system for improved decision quality.

This cycle transforms strategy from a one-time plan into a disciplined, repeatable system for high-stakes decision-making.

AREAS OF EXPERTISE & SERVICES

Core Advisory Domains

Hunting Maguire's work spans several interconnected lanes:

Strategic Intelligence & Framework Design

We develop strategic frameworks and institutional-level roadmaps that strengthen positioning, clarify priorities, and enable decisive action.

AI-Enabled Transformation & Decision Architecture

We integrate advanced technologies and intelligence systems to enhance judgment, accelerate execution, and improve organizational performance.

Policy, Regulatory & Geopolitical Analysis

We help clients anticipate shifts in regulatory, political, and economic environments—and design strategies that shape, rather than merely react to, those environments.

Brand, Reputation & Influence Strategy

We design narrative, reputation, and influence strategies that position clients for leadership across industries, institutions, and global markets.

Confidential UHNW & Executive Advisory

We provide private counsel for leaders navigating sensitive decisions, crisis environments, personal transitions, or mission-critical opportunities.

STRATEGIC INITIATIVES & IMPACT

Selected Strategic Initiatives & Impact

Illustrative Domains of Experience

Sean's advisory work and frameworks have been applied across high-impact arenas, including:

National Security & Government Strategy

Advisory input on national security and economic strategy, including maritime dominance frameworks and diplomatic initiatives.

Economic & Legislative Innovation

Strategic thinking around sovereign wealth concepts, digital asset policy, and legislative architecture.

Global Development & Humanitarian Systems (MEGA Ecosystem)

Founder of the MEGA Ecosystem, a portfolio of 17+ large-scale initiatives spanning health, housing, education, climate resilience, mental health, and global philanthropy.

These experiences are not presented as case studies to be replicated, but as proof of range: from national to institutional to individual, the same core principles apply—clarity, structure, intelligence, and execution.

THE MEGA ECOSYSTEM

The MEGA Ecosystem

A Unified Architecture of 17 Strategic Initiatives Driving Global Development and Long-Term Resilience

The MEGA Ecosystem is a coordinated portfolio of seventeen large-scale initiatives designed to strengthen national resilience, accelerate human development, and modernize global systems. Each initiative functions independently yet reinforces the whole—creating a scalable, integrated framework for long-range strategic impact.

Human Development, Education & Workforce

- Global Education Reinvention – Adaptive learning systems enabling strategic, cognitive, and creative capability at scale.
- Future of Work Transformation – Workforce modernization aligned with technology, productivity, and innovation.
- Global Youth & Orphan Network – Integrated pipelines supporting vulnerable youth through education, housing, and career readiness.
- Mental Health Reinvention System – Early-intervention mental health infrastructure strengthening population resilience.

Health, Medicine & Human Resilience

- Preventive Health System – Population-level health models focused on prevention, early diagnostics, and coordinated care.
- Longevity & Regenerative Medicine Initiative – Regenerative therapies restoring function and extending healthy lifespan.

THE MEGA ECOSYSTEM CONT'D

Infrastructure, Housing, Climate & Cities

- Next-Gen Housing System – Scalable, rapid-deployment housing models for affordability, stability, and resilience.
- Regenerative Food System – Modernized agriculture and supply chains supporting food security and sustainability.
- Climate & Resilience Network – Climate-secure infrastructure and long-range environmental risk architecture.
- Prototype Smart Future City – Technology-enabled urban design integrating mobility, sustainability, and digital systems.
- Sanctuary at Serenity Square – A next-generation community model converting underutilized commercial space into integrated, walkable environments combining housing, healthcare, training, and essential services for veterans, families, and local populations.

Security, Governance & Global Stability

- Civilian Conflict Prevention Network – Predictive analytics and early-warning systems to prevent conflict escalation.
- Criminal Justice & Reintegration System – Evidence-based rehabilitation and reintegration improving long-term public safety.
- Disaster Response Global Grid – Unified global framework for rapid, coordinated emergency and crisis response.

THE MEGA ECOSYSTEM CONT'D

Culture, Philanthropy & Human Advancement

- Global Philanthropic Alliance – Coordinated strategy and capital alignment for measurable, multi-domain global impact.
- Consciousness & Evolution Institute – Frameworks advancing human capability, leadership intelligence, and cognitive development.
- Creativity, Arts & Cultural Renaissance – Cultural and creative infrastructure strengthening societal cohesion and economic vitality.

System Integration

- MEGA Ecosystem Operations Framework – The master integration layer aligning all initiatives into one cohesive strategic system.

ENGAGEMENT SNAPSHOT & NEXT STEPS

How Engagements Work

Every engagement is tailored, but most follow a simple structure:

Initial Conversation

A confidential discussion to understand your priorities, context, and what is at stake.

Strategic Intake & Assessment

A focused discovery period where we map key dynamics, risks, and opportunities.

Blueprint & Recommendation

A concise, actionable strategic brief outlining options, pathways, and recommended direction.

Ongoing Advisory / Outside CSO Role (Optional)

Continued partnership to support execution, adapt to new information, and serve as a private strategic counterpart as decisions unfold.

Next Steps

If this Playbook resonates with how you think and operate, the next step is simple:

Schedule a confidential introductory conversation.
